Education

Willamette University .... *Aug. 2025–May 2026*
- B.A., Politics, Policy, Law, & Ethics. GPA: 4.00.
- Elected Senator for the Associated Students of W.U.
- Served on the executive board of 3 student organizations.

Damien High School .... *Aug. 2021–May 2025*
- Valedictorian, Junior of the Year, AP Scholar with Distinction, and NMSC commended student. GPA: 4.55 (3.98 u.).
- Certificates of outstanding achievement in 18 classes.
- Participated in the Project Lead the Way Engineering and Computer Science programs.

Extracurriculars

British Parliamentary Debate .... *Aug. 2025–Present*
- Debate Union Treasurer; Managed a $3,000 budget and coordinated expenditures across registration, travel, and other forensic events.
- Competed in local and national circuits, accumulating multiple finals placements and speaker awards.

Policy Debate .... *Aug. 2021–Apr. 2025*
- Varsity letter and team captain; Constructed numerous research-based defenses of policy and critical propositions.
- Competed on the national circuit with numerous deep tournament runs and qualified to the Tournament of Champions twice.

Model United Nations Club .... *Aug. 2025–April 2026*
- Treasurer; Organized the hosting of multiple conferences.

Mock Trial .... *Sep. 2023–Dec. 2024*
- Team captain, club Vice President, lead pre-trial attorney, and primary student organizer.

Scouting America .... *Jul. 2018–May 2025*
- Troop 403; Eagle Scout (Board of Review pending).
- Project consisted of significant landscaping, woodworking, and repair efforts at a children's center over 130 hours.
- Led classes for youth aged 11–17 in domestic and national politics, fitness, communication, environmental science, and metalworking.

Robotics .... *Aug. 2024–Jan. 2025*
- Lead coder for national-circuit VEX V5 competition.

Christian Leadership .... *Aug. 2024–May 2025*
- Led religious retreats for peers with a strong emphasis on community-building and spiritual growth.

Dungeons and Dragons Club .... *Oct. 2021–April 2026*
- President in H.S. and Treasurer in college.

Ultimate Frisbee Club .... *Oct. 2023–Oct. 2024*
- Secretary; Managed communication and statistics.

Stagecraft .... *Jan. 2026–April 2026*

Road Cycling Club .... *Aug. 2021–Dec. 2022*

Summary

Interdisciplinary student and researcher actively engaged in competitive academic discourse, data-driven technical and policy research, and community service.

Research & Programs

Computing Research Association ...... *Feb. 2026–Present*
- Contracted researcher in the CRA UR2PhD REU program.
- Explored the application of machine learning algorithms to the opioid epidemic and built analytical skills.
- Developing a spatio-temporal predictive model to classify overdose risk rates based on the SDoH.

LEGO Robotics STEM Program .... *Jan. 2026–May 2026*
- Taught Lego Robotics to 1st grade students at Title I elementary schools through a service-learning course.
- Guided students to follow instructions while consistently reinforcing creativity and problem-solving skills to assure success in alignment with state learning goals.

Univ. of Michigan Debate Institute ... *Jun. 2023–Jul. 2023*
- Studied fiscal redistribution and solutions to income inequality with targeted research on the expansion of SSI to U.S. territories and a FJG in the executive branch.

Gonzaga Univ. Debate Institute .... *Jun. 2022–Jul. 2022*
- Analyzed U.S.-NATO security cooperation over emerging technologies, specifically regarding integrating machine learning in military and scientific technology and combating disinformation with cybersecurity techniques.

Project Examples

QEMU RISC-V Operating System .... *Jan. 2026–May 2026*
- Built a bare-metal O.S. in C for RISC-V architecture with dynamic memory allocation, error handling with runtime symbol resolution, and an interactive Snake game.

Brick Classifier Prototype .... *Aug. 2024–May 2025*
- Designed and prototyped an automated LEGO sorter machine with a Java host communicating over SSH with an RPI, a VEX V5 brain, an ESP32-CAM, and a gRPC server for real-time classification and motor movement.

Skills

Languages	Java, C#, Rust, C, C++, LaTeX, Python
Software	Git, Vim, Unity, CMake, Fusion360, LVGL
Platforms	Windows, Linux (Arch), MS Office, Google Workspace, Raspberry Pi
Engineering	CAD modeling, technical drawing, embedded systems, 3D printing
Applied	Landscaping, woodworking, construction, maintenance work
